Hiring Committee

Kreativstorm

Delhi, India

Dear Hiring Committee,

I am excited to apply for the Data Analyst Internship at Kreativstorm, as advertised. With a background in Computer Science and Data Science from MLR Institute of Technology and a CGPA of 8.39, I am eager to bring my analytical expertise and technical skills to your innovative consulting team.

My academic and project experience has equipped me with a strong foundation in data analysis, programming, and visualization. I have developed skills in Python, Java, SQL, and Power BI—critical tools that I have applied in projects involving real-world datasets. For instance, I analysed the BlinkIt application dataset using Power BI, creating an interactive dashboard that highlighted key sales trends, product insights, and customer ratings, supporting strategic decision-making. Similarly, I designed a chatbot for Arundathi Hospital using natural language processing with Python and TensorFlow, showcasing my ability to build data-driven solutions and user-centric applications. Additionally, my recent Diwali Sales Analysis project utilized MySQL to conduct a comprehensive assessment of sales data, furthering my expertise in statistical analysis, data cleaning.

Thank you for considering my application. I am enthusiastic about the possibility of contributing to Kreativstorm and look forward to discussing how my background and skills align with your goals.

Sincerely,
Samala Ritesh Dhyan
